#### CONGER PRAISES MINISTER WU.

Says the Chinese Diplomat is a Hero and a Friend.

A dispatch from Chicago last night says: "Minister Wu is a hero and is entitled to the lasting gratitude of every American citizen." The statement now being circulated that I ever challenged his truthfulness or his honesty of intention is absolutely false.

In these words Major E. H. Conger.

#### Speakers for Mass Meeting.

It is expected that at the mass meeting to be held Thursday evening at Masonic Temple, under the auspices of the Business Men's Association, to discuss the establishment of a new business district in the city, B. H. Warner will give the details of the recent conferences with the proprietors of the Pittsburgh business interests. Invitations to attend and deliver addresses have been issued also to Mr. S. W. Woodward, Mr. Geo. Truesdell and Mr. L. E. Powell. Mr. O. Crosby, as heretofore announced, will make the principal address of the evening.

### TWO STILL HOLD OUT

#### WOMEN WILL NOT JOIN THE BOOK-BINDERS' UNION.

All Others in the Government Printing Office Have Done So—Probable Outcome.

It will probably be but a short time before the women can be employed in the government printing office without being a member of organized labor. That is now, and has for many years, been the condition that has applied to the men bookbinders. The women desiring the same standing in the office as is enjoyed by the men have for several years been working to effect an organization that will cover every one of the thousand or more women who work in the bookbinding department. During the last year the women have been especially vigorous. Now they have in their organization every woman in the office who is eligible to membership except three, and one of these has made application to join their ranks and will soon be taken in by them.

**Two Still Hold Out.**

Two of the women bookbinders now hold out against them, and these two say positively they will not join. They don't like labor organizations for women, they say, and all the persuasion that a thousand of their fellow workers have been able to bring to bear on them has been in vain. They simply say they will not go in, and one of them has declared with vigor she will resign her position before she consents to become a member of organized labor.

The women's bookbinding union has grown to such strength that it has been recognized by the men, who are in both the printers' and bookbinders' unions. The claims of the new union for the same recognition that is given the men's organization are constantly being urged upon the office. It is generally held that the women have complied with the requirements which have given the men the right to object to the employment of any one not a member of the union, and that it is a discrimination against them to longer withhold equal recognition from them. The organized bookbinders and printers take issue on this point, and they are now at the moment the women bookbinders can report that their union contains every woman eligible to join it in the office they will be placed on a footing of equality with the men, so far as confining employment only to union women. But two women declare that they will not go in, which is the reason for their being out of the union, and means are being considered in the office for relieving the situation.

**The Probable Outcome.**

What is likely to be done is that if the two persistent women bookbinders continue to refuse to go in the union, they will be transferred to some other class of work which would not make them eligible to join the organization. It is likely that harmony among the women bookbinders will be secured in this way in a very short time. The women so transferred will probably have less pay than they are now receiving. Their transfer will at once make the office absolutely "union" so far as women bookbinders are concerned, and after that no woman will be employed in the office who is not a member of organized labor.

### ALLEGED PICKPOCKETS.

#### Police Seeking Two Who Forfeited Bonds Given for Appearance.

Major Sylvester and Inspector Boardman are making every effort to apprehend John Morgan and James Harkes, alleged pickpockets, who are under indictment here charged with having picked the pocket of Mrs. Hanna G. Lee of Atlantic City the day following the recent presidential inauguration. The defendants were released on \$1,500 bail each shortly after their arrest, and when the case was called for trial a few days ago they failed to respond, and their bond was forfeited. Bench warrants were at once issued for them.

Detective McQuade of Pittsburgh and Detectives Tyser, Howlett and Parham arrested the men in the Baltimore and Ohio depot and recovered Mrs. Lee's pocket-book. When taken to police headquarters the prisoners talked freely with the detectives and while the latter were satisfied that the men should be in custody they were unable to find they had records under the names they gave. Friends of the strangers appeared shortly after their arrest and furnished money for the employment of counsel, as well as to secure bail. The detectives, however, were satisfied the men would not respond to answer an indictment.

An illustrated circular, asking for the arrest of the alleged pickpockets was sent out by police headquarters yesterday. Morgan is described in the circular as being thirty-eight years old, five feet six and a half inches; 205 pounds; stout build, fair complexion, light brown hair, blue eyes, round face, long perpendicular scar on left wrist, three scars on forehead, one is small and on left side; claims to have been born at Montreal, Canada; speaks with English accent.

Harkes is twenty-five years old, five feet five and one-eighth inches, 122 pounds; slender build, dark complexion, black hair, blue eyes, thin face, claims to have been born at Dublin Ireland; speaks with English accent.

Copies of the circular have been sent to various cities in the United States and Canada, with a request that the police officials make diligent inquiry and cause the arrest of the defendants, who are wanted, no matter where they are apprehended.

The police officials are more anxious to land these men in prison than they are concerning most men of this class. If they can be brought back to the city they will understand that they cannot come here and operate without fear of being prosecuted.

### ANTI-SALOON LEAGUE.

#### Proceedings of Semi-Monthly Meeting Held Last Evening.

The regular semi-monthly meeting of the Anti-Saloon League was held last night at the hall of the society, 623 Louisiana avenue. President Edwin presided, and in the absence of the chaplain prayer was offered by John S. Blackford. The office of secretary being vacant, Mr. A. J. Edson was called upon to fill that position for the evening. The chairman of the committee on co-operation reported a new delegation from the Metropolitan Epworth League, consisting of Luther L. Derrick and Miss Laura Church, and they were duly elected members. Alvin H. Line, representing the United Brethren Church, and Edward J. Society, and Samuel S. Thomas, a delegate from the People's Congregational Church, were present for the first time and were introduced to the league as new members. Mr. Hermon C. Metcalf, chairman of the committee on mass meetings, presented a report of a meeting held at Faith Chapel, on M street near 4th street, last Saturday evening. May 5. Mr. A. N. Canfield delivered an address at that meeting outlining the work of the Anti-Saloon League in reducing crime by minimizing the saloon. An address was also made by President Edwin.

The league's attorney, Mr. Shoemaker, reported that the application of liquor seller on Louisiana avenue had been rejected; also that an application from a saloon on 14th street had been rejected.

A few copies of the proceedings of the fifth anti-saloon convention held in Chicago last year were distributed. This pamphlet contains the roster of the convention and a succinct account of that meeting. The president's address before the convention was given in full.

A committee of three, consisting of Messrs. Suter, Canfield and Shippe, was appointed to examine the old records of the society with a view to the coming anniversary of the society.

The attendance embraced representatives from the following churches, temperance societies and other organizations: Baptist, Calvinist, First and People's Churches, Methodist, Epworth League, Presbyterian, Eastern C. E. Society and

### RECORDED TO ATTORNEY.

#### Question Regarding Alley Work Under Act of Congress.

Upon the recommendation of Engineer Commissioner Beach, the District Commissioners will within the next few days refer to the attorney for the District a rather important question regarding alley work, with the request that he interpret the meaning of an act in connection with the same. Commissioner Beach's recommendation is to have the law relating to improve and repair alleys and sidewalks. In a case under consideration it is desired to grade an alley, but not to pave it at the present time, as such pavement, if laid, would have to be disturbed in the placing of connections for sewer, etc.

### High Points in Washington.

To the Editor of The Evening Star:

My attention has been called to an item in The Star of Saturday, May 4, which

### Chief Engineer Dutton of Fire Department on Inspecting Tour.

Chief Engineer Robert W. Dutton of the fire department paid a visit to Georgetown yesterday afternoon and inspected the companies located in this section. No. 5 company, on M street, was first visited and Foreman Kraemer showed the chief through the building. Assistant Chief Kurtz was with the chief engineer on the trip. From the engine house a visit was made to truck E, on S street between 34th and 35th streets, where the new chief was welcomed and shown through the place.

### A eucharist party was given last evening at St. John's Hall, for the benefit of the confectionery table at the proposed fair for the benefit of St. Ann's Church, Tenleytown, to be held the last part of this month. Mrs. Charles P. Stohlmeyer, in charge and a number of good prizes were offered. About seventy-five people attended. The ladies first prize was won by Miss Annie E. Grant and the gentlemen's by Mr. Harry Ward. The consolation prize was won by Dr. Stull.

### The funeral of Miss Addie Lewis, organist of the First Baptist Church and daughter of Prof. J. Henry Lewis, took place yesterday afternoon at the Metropolitan A. B. Church, on M street. The funeral services were many, including a beautiful hymn from the First Baptist Church.

### There was a very quiet wedding Friday evening at the residence of Mr. and Mrs. J. H. Lewis, corner of 25th street and Pennsylvania avenue, the contracting parties being Miss Addie Lewis and Mr. Harry Ward. The ceremony was witnessed by only a few people. After the ceremony the newly married couple took a short honeymoon trip to the city.

### A permit has been issued for minor repairs to the parsonage of the Dumbarton Avenue M. E. Church, at 3130 Dumbarton Avenue. The repairs will be made by the church's own carpenter.

### Dr. Theophilus Bray is delivering a course of interesting lectures on Bunyan's Pilgrim's Progress, with stereopticon views, at the Tenleytown Baptist Church.

## The Palais Royal.

SPRING "Opening" in the department for Toilet Needs. With a stock of high-class goods in wholesale quantities and with prices very much less than prevailing for best the Palais Royal has long since earned and won the patronage of Washington's elite. For the present "Opening"—this week—the representative of Madame LeFevre will be here to demonstrate the best of Toilet aids.

Dr. Laura S. Brennan, graduate of Prof. Lambert, London, England, has been engaged for the manicure and facial massage parlors. The Toilet Article Department will offer the following special attractions as "Opening" Souvenirs:

### Famous Beauty Makers

The LeFevre Skin Preparations.

To enhance one's good looks should be the aim of every woman. Mme. LeFevre's specialist from her main parlors offers the following as the greatest beauty-makers of the age:

VELOUX brings about astonishing results in removing roughness and freckles from the skin. A perfectly smooth, clear, and healthy skin, and is a delightful cream for the face. Price, \$2.00.

CREME ROYALE, cleans the face of all blemishes and discolorations. It is a delicate liquid preparation that whitens the skin permanently. Price, \$1.00.

VIOLAT and CUCUMBER CREAM is needed on every toilet table all the year. It removes redness and roughness and softens the tissue and lips as nothing else will do. Price, \$1.00.

MANDO is the most efficient of disfiguring growths of hair. Removes them altogether. A quickly five minutes does the work. A little of cream or hair. Price, \$1.00.

These, with all the other preparations, are demonstrated here by a special representative of Madame LeFevre, who is here from Philadelphia for this week only. The ladies are not to be missed. Inquire at counter rear of store.

### Woodworth's \$1 Special During This Week - - - - - 49c

Choice of Woodworth's Violets of Sicily, Blue Lilies, Heliotrope and Carnation Pink. In presentation form—put in large artistic bottle, which nestles in daintily illuminated box.

### Roger & Gallet's Specialties.

Very pleasant surprises promised for tomorrow. By special request of the American representatives of Roger & Gallet, we are not to publish just what these surprises are to be. Inquire at counter rear of store.

### Tomorrow's Third Floor Attractions.

New things—usually pretty things—are arriving this morning. The "buyer" rushes up to the writer's office and requests mention in "The Star." Samples are brought up for inspection—and here's a hurried word picture of them:

#### Shirt Waist Suits

Of white India linen and colored chambray. One very attractive style has all-over tucked waist and skirt with full ruffle. So attractive that the price will be a surprise. **\$4.98**

#### Traveling Suits.

For traveling and to wear at seashore or mountain—what more appropriate than a Cheviot Suit? These have been silk-lined and have effect front and position back. The shirt is cut full, finished with several rows of stitching. The appearance of a \$30 made suit, for... **\$10.98**

#### New Lawn Dresses.

Summer poems—these lovely Lawn Gowns. Most have fancy waists with round and square necks, some with white vest and cutaway skirts. The ruffles are arranged over the shoulders and trimmed with narrow ruffles. The coming gift grades may probably anticipate **\$6.98**

#### Dressing Sacques.

The prettiest of fancy lawns have been made up with jaunty dip front and tight fitting back. The trimming of ruffles is arranged most happily. If asked \$1 you would judge the price very moderate. You'll be quite grateful when asked **69c**

#### Corset Covers.

A typical French Corset Cover of sheer muslin, with four insertings of lace in the front, as a picture, and fitting like glove. If the clerk asked you \$1 you would not deem it a bargain. It is a bargain price. What will you think of only... **39c**

### Handkerchiefs—Two Kinds of Bargains.

Girl graduates usually come here for their dainty Handkerchiefs. Earned their patronage with an annual sale when rarely good bargains are offered. For tomorrow we say 50c, 75c, \$1, \$1.50, \$2 and \$2.68 for the prettiest and every way best Handkerchiefs the prices ever brought. Nearly one thousand of these gems of Handkerchiefs and each one a bargain.

#### Pure Linen.

Every now and then we get a big shipment of these Pure Linen Handkerchiefs from Ireland—just as they come from the nurseries where they are embroidered. Many here tomorrow.

**13c.**

#### Two for 25c.

Ladies' and men's sizes are now here, and all initials. Think of only 13c for a warranted pure linen Handkerchief with initial embroidered by the deft fingers of Erin's best women!

### 79c for \$2 Butter Dishes.

The last baby is always the pet, though often not as attractive as its predecessor. So with butter dishes—these. Good value at \$2, because the product of a reliable maker. The instead of \$2 only because a new style is being introduced—and these are the old.

### 89c for \$1.50 Soup Ladies.

Three styles to select from, each in attractive box. But never mind the box—learn that these ladies were made by the famous "Rogers" and know that you have discovered a rare bargain.

### 49c for \$1 Salad Spoons.

Berry or Salad Spoons. Two styles, one with gold bowl. Rogers made these for presentation spoons, each being suitably boxed. A hundred of them. And fifty of Rogers' Old Meat Forks at 33c instead of \$1. Two styles, one with gold lining; boxed.

### 39c for \$1.00 Sets.

Butter Knife and Sugar Shell in fancy lined box. Good value at \$1—because the reliable guaranteed silverware so seldom offered at a reduced price. If selected for presentation will be suitably packed for mailing.

### 25c for Solid Gold Shell Rings.

Of course, there's a "catch" somewhere. The maker, however, guarantees these rings for three years. Gold or no—they will not blacken the fingers or tarnish for at least three years. And who is to say these are real or mock precious stones? A poorly dressed woman might wear the genuine—and you would judge them false. A well-dressed woman can wear these mock jewels with impunity. See display at G street door.

### 25c.

Jewel-top Tobacco Jars, Cigar Jars, Soap Boxes, Candlesticks, Napkin Rings, Thermometers, Perpetual Calendars, Salt and Pepper Shakers, Hair Creamers.

## Trunks Lettered Free.

"The Trunk Store of Washington"—is on this Basement floor of the Palais Royal. Whether you want the best trunk—here at \$35—or the cheapest—here at \$1.69—you are assured choice of best variety and the guarantee of satisfaction. Ask to see the "Pan-American," made expressly for us and guaranteed the equal of the trunkmakers' \$10 trunk. And see the genuine Hornback Alligator Bag at \$2.69. Basement floor.

### The \$4.98 Trunk.

This is the "Pan-American" Trunk, with solid leather binding and all the attributes of the best made. Guaranteed in every sense of the word. Will last a lifetime.

### The \$2.75 Trunk.

Canvas-covered Trunk, with 3 long strap hinges; strong bolts, corner rollers, No. 8 clamps and iron bottom. Better than usual \$3.50 Trunks.

## Palais Royal, G & 11th.

contains certain errors of fact of such general interest and importance that I feel sure you will thank me for calling attention to it, and will allow the correction. I refer to an item under the head of "Things Heard and Seen" treating of the highest and lowest points in the city and District and their comparative elevation. Of the eastern section of the city, including Capitol Hill, the statement is made that "its average height above the river is much greater than is generally supposed, some parts reaching a height of 130 feet." The grade maps in the District engineer's office (which are, of course, authentic) show that the highest point in East Washington is at East Capitol and 24 streets, and that is 94 feet above mean low tide. While the average elevation of the plateau is below 50 feet.

Again, the item says: "The highest point in the city proper is in the vicinity of 1st and I streets northwest, where the elevation is officially given as 90 feet. The elevation at the point named is officially given at 50 feet, while the elevation of the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th street at the intersection of R street northwest (100 feet) and again treating of the highest and lowest points in the city and District, and that the lowest point is at the intersection of the city limits which reach the 100-foot mark—for example, 14th
